

# xTractor 6000

## A New Dawn in Oil Extraction is Here.

The AirTech xTractor® 6000 is a rugged and powerful tool that makes extracting oil and other contaminants from your foam based pad or boom products easier than ever before.

Whether you use AIR TECH's specially formulated oil absorbing Smart Foam Pads or our Oil Containment Booms, the xTractor 6000 series is the most heavy duty, efficient and competitively priced petroleum collection system on the market.

The xTractor 6000 incorporates six adjustable rollers to that insure durability while maximizing the total amount of oil or petroleum extraction during reclamation applications. Much more than a wringer, the xTractor 6000 is a complete collection system.

To order, or for more information, contact your reseller or call us at (949) 273-8100. Visit us on the web at [smartfoamproducts.com](http://smartfoamproducts.com) for the latest information.

Often times, it is much less expensive to dry pads, towels and booms than to dispose of them wet. In the case of reusable items including damp towels, rugs and carpets, passing these wet items through an efficient heavy duty wringer, prior to placing the items in a dryer, saves not only time but also wear and tear on the dryers themselves. When dealing with oil soaked or chemical soaked absorbents it is much less expensive to handle these items during the disposal process when they are dry versus wet.

Our AirTech xTRACTOR 6000 is a patent pending six (6) roller system which is a great solution for desaturating any flat sorbent pads, flat booms, towels, small diameter socks, rugs and carpets. Designed by experts in the oil absorption and reclamation industry, the xTractor 6000 is a leader in every sense of the word.
